CJIS Alignment Brief

ETL GIS Consulting LLC partners with justice and public safety organizations to maintain FBI Criminal Justice Information Services (CJIS) compliance throughout every phase of GIS modernization.

Key Commitments

• Security policy mapping across CJIS Areas 1-13 with control ownership documented for product, infrastructure, and data teams.

• Encryption-in-transit and at-rest validation for ArcGIS Enterprise, utility network data, and cloud storage resources.

• Multi-factor authentication and federated identity integration aligned to CJIS Policy Section 5.6.

• 24/7 monitoring playbooks with incident response escalation workflows tested quarterly.

Engagement Roadmap

Phase	Focus	Artifacts
1. Assessment	CJIS policy gap analysis and stakeholder interviews	Gap matrix, remediation backlog
2. Engineering	Secure architecture patterns and data protection controls	Security design package, encryption configuration
3. Operations	Sustainment playbooks and audit readiness coaching	Runbooks, audit evidence catalog
